Re: Agency Interest No. 286

Dear Mr. Jordan:

In accordance with the Emission Reduction Credit (ERC) banking regulations in LAC 33:III.Chapter 6, ExxonMobil Chemical Company, Baton Rouge Chemical Plant (BRCP) is submitting this report to comply with the requirements in LAC 33:III.613.B. & C. The required VOC and NOx forms are attached.

The VOC credits available for offsets were those remaining from the ERC Certificate created for the HFU Air Emission Reduction Project. The date of this emission reduction was January 1, 1994. Per LAC 33:III.607.B.2, emission reductions are creditable for up to 10 years from the date of actual emission reduction to the atmosphere. Therefore, remaining credits expired as of January 1, 2004. There were no additional emissions reductions projects submitted in 2004 for banking. Therefore, BRCP currently has no VOC credits in the bank.

If you have any questions, please contact David Pultz at (225) 977-8369.

DEQ - OES
