Worksheet for Technical Review of Working Draft of Proposed Permit

Company Name:	**Gulf South Pipeline Company LP**	**AI #:**	**7832**	**TEMPO Activity No:**	**PER20070001**
Facility Name:	**Bistineau Compressor Station**	**Remarks Submitted by:**	**David Nickel – Gulf South Pipeline Company, LP**		
Permit Writer:	**Scott J. Templet**	**Permit Writer Email address:**	**Scott.Templet@la.gov**		

Instructions

Permit Reference – Indicate specific portion(s) of the permit to which the remark relates (i.e. "Specific Condition 120", or "Section II Air Permits Briefing Sheet", etc.).

Remarks – Explain the basis for each remark. Provide regulatory citations where possible. If the remark is made due to an error or omission in the permit application this must be noted and the revised information ***must be submitted.*** Revised information may be submitted separately from this worksheet. Please be aware that revised information must be submitted in writing and certified by the Responsible Official, and if necessary, by a Professional Engineer licensed in Louisiana. *Please Note:* New or additional equipment, processes or operating conditions not addressed in the original permit application will be addressed on a case-by-case basis. The Department reserves the right to address such changes in a separate permit action.

DEQ Response – ***DO NOT COMPLETE THIS SECTION.*** This section will be completed by Air Permits Division of DEQ, included in the proposed permit package and made available for public review during any required public comment period.

- Additional rows may be added as necessary.
- Completed Form shall be emailed to the Permit writer in MS Word compatible format within the deadline specified in the email notification.

Permit Reference	Remarks	Air Permits Division Response (for official use only)
Emission Rates for TAP/HAP & other Pollutants	**EQT0004 (C-4) Acrolein average lb/hr should be 0.03 and maximum lb/hr should be 0.04.**	**Acrolein hourly emissions (average and maximum) were corrected.**
Specific Conditions 104 -109 for EQT0029 (B-1) Blowdown Stack	**The blowdown stack is exempt from the requirements of the Waste Gas Disposal rule per LAC 33:III.2115.H.1.c.** **Attached with these technical review comments is a revised EIQ sheet with revised emission calculations lowering the conservatively high permitted potential emission estimates from the engine blowdown stack. The lower annual potential gas rate now has an average short term rate under 100 lbs VOC/day.**	**Due to the revised calculations, now this source meets the exemption criteria for LAC 33:III.2115. Therefore all specific requirements with the citation of LAC 33:III.2115 have been removed from the permit with the exception of a recordkeeping requirement.** **Also, the revised emissions were updated for this source.**
