

The **13th International Congress on Combustion By-Products and Their Health Effects** will be in New Orleans, so this is a great opportunity to attend a valuable meeting without having to travel very far. Please pass this information along to anyone in your organization who might be interested:

May 15th -18th, 2013
Marriot Convention Center Hotel, New Orleans, LA

The International Congress on Combustion By-Products and Their Health Effects is pleased to announce its 13th Biennial Congress. This international meeting will bring together academic, government, and industrial representatives to present research findings, update international policy, and discuss critical issues concerning emissions of toxic by-products from combustion processes. The meeting will begin with registration and a welcome reception on the evening of Wednesday, May 15th. There will be five half-day sessions (Thursday-Saturday morning), a poster session on Thursday evening. The conference will end at noon on Saturday the 18th. There will be 6 plenary sessions featuring invited talks by established leaders and junior investigators and students.

Plenary Sessions will include:

- Respiratory health effects of combustion pollution
- Mechanisms linking combustion pollution and cardiovascular toxicity/dysfunction
- In situ burning to remediate the Gulf oil spill
- Environmental sampling: advances, challenges, and implications
- In vivo and in vitro dosimetry: implications for respiratory toxicity testing
- Human clinical/toxicology studies and epidemiology

Limited travel support will be available for students and junior faculty at universities within the United States.
