

NOTICE

Completed REPAIR FORM Required For Vehicle Retest in the Baton Rouge Ozone Nonattainment Area

Currently, motorists whose vehicles fail the emissions portion of the annual inspection receive a Vehicle Inspection Report (VIR) describing the reason for the failure, a **Repair Form** and a list of failure procedures.

Effective December 1, 2006, a completed Repair Form **must** be provided to the station prior to vehicle retest. The retest is free if the vehicle returns to the original inspection station within 30 days of issuance of the rejection sticker. If the vehicle is presented for a retest after the 30 day time-frame or goes to another station besides the original one, the motorists will be subject to paying the \$18 inspection fee. **In either case, the inspector will not be able to proceed with the retest for an emissions failure unless the completed Repair Form is returned.**
