Public Notice and Comment

Alternative Emission Reduction Plan (“Bubble”)
For Union Carbide Corporation, Taft Plant

3. The permitting authority may approve an owner or operator's application for authorization to operate under the general permit without repeating the public participation procedures. Such an approval shall not be a final permit action for purposes of judicial review regarding the terms and conditions of the general permit.

4. Any source which is issued the general permit shall, notwithstanding a permit shield, be subject to enforcement action for operation without a permit if the source is later determined not to qualify for the general permit.

5. General permits shall not be issued for affected sources under the Acid Rain Program established pursuant to Title IV of the Clean Air Act.

The proposed "General Permit Facility Specific Requirements" section contains the universe of regulations that may apply to the facility and associated equipment. If any regulation applies to any facility or associated emission source, and is not part of the attached specific conditions, then that facility cannot be granted a General Permit. An exception to this is when there is a specific condition that meets all of the requirements of being a state only requirement. This excludes federally enforceable specific conditions or limitations. The General Permit Statement of Basis provides additional information regarding how a facility specific General Permit contains only those regulations that apply to the specific facility and its associated emission sources.

A technical review of the working draft of the proposed permit was submitted to the facility representative and the LDEQ Surveillance Division. Any remarks received during the technical review will be addressed in the "Worksheet for Technical Review of Working Draft of Proposed Permit." All remarks received by LDEQ are included in the record that is available for public review.

Written comments, written requests for a public hearing or written requests for notification of the final decision regarding this permit action may be submitted to Ms. Soumaya Ghosn at LDEQ, Public Participation Group, Box 4313, Baton Rouge, LA 70821-4313. Written comments and/or written requests must be received by 12:30 p.m., Thursday, June 21, 2007. Written comments will be considered prior to a final permit decision.

If LDEQ finds a significant degree of public interest, a public hearing will be held. LDEQ will send notification of the final permit decision to the applicant and to each person who has submitted written comments or a written request for notification of the final decision.
