LIST OF INACTIVE AND ABANDONED SITES – POTENTIAL	20
SUPERFUND SITES IN LOUISIANA	25

PURPOSE

This report provides an annual update for FY 2014-15 regarding the LDEQ Underground Storage Tank and Remediation Division's (USTRD) inactive and abandoned waste site cleanup activities, the remaining confirmed and potential site inventories, and comprehensive lists of completed and remaining sites, as required by La. R.S. 30:2226.H(2). Louisiana's Superfund sites and future state funding needs for Superfund sites are also discussed in this year's report.

INACTIVE AND ABANDONED WASTE SITES COMPLETED

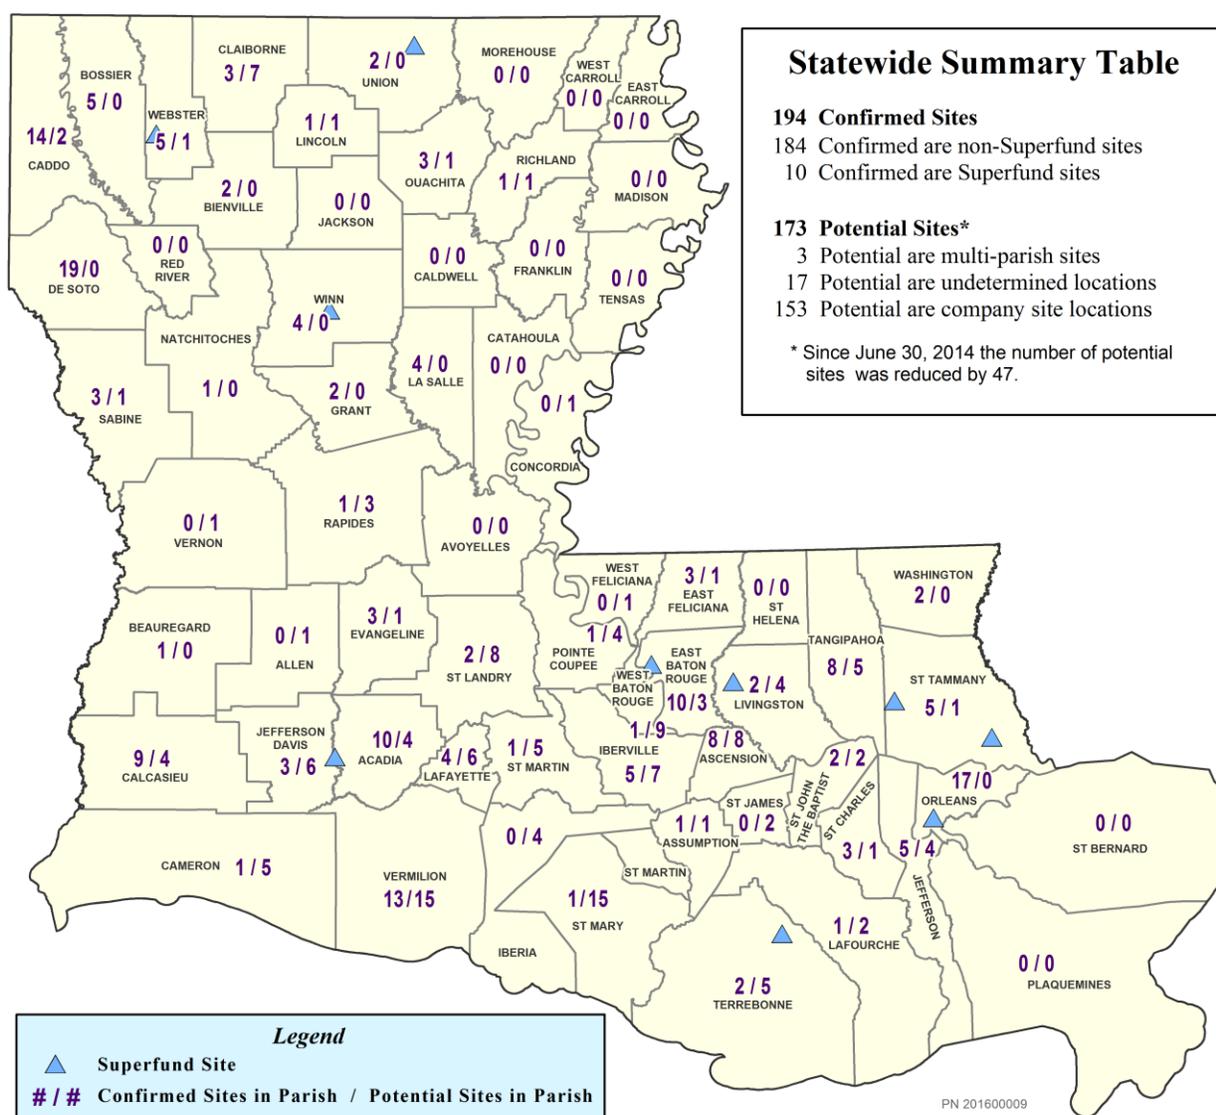

The primary purpose of this report is to provide an annual update regarding cleanup of the state's inactive and abandoned waste sites, as required by La. R.S. 30:2226.H(2). The 57 inactive and abandoned waste sites completed by the USTRD during FY 2014-15 are mapped below and listed on pages 7 - 14.

Figure 1. Number of inactive and abandoned sites completed in FY 2014-15

REMAINING INACTIVE AND ABANDONED WASTE SITES – CONFIRMED AND POTENTIAL

At the end of FY 2014-15, there were 194 confirmed inactive and abandoned waste sites in the remediation site universe. In addition to the 194 confirmed sites, there were 173 potential sites possibly needing evaluation at the end of FY 2014-15. Comprehensive lists of all of the inactive and abandoned confirmed and potential sites known as of June 30, 2015 are provided in this report on pages 15 - 24, and they are mapped below.

Potential sites are those sites that have been identified or reported to LDEQ but have not yet been physically inspected or sampled to confirm whether there has been a release of any contaminants of concern. These sites can be identified from a number of resources, such as historic manufacturer directories, referrals by the U.S. Environmental Protection Agency (EPA), and citizen complaints.

Within the last six years, the USTRD has reduced the number of potential sites from 428 to 173 - a total reduction of 255 sites. Most of these historically reported potential sites are completed and closed following evaluation and assessment; however, those sites that are confirmed are further investigated to identify responsible parties and to determine the full nature and extent of contamination so cleanup plans can be developed. Interim removals of surface hazards or other measures may be conducted initially to mitigate threat of exposure or further environmental damage. Confirmed sites with no financially solvent responsible parties may be eligible for remediation with government funding from EPA Superfund (if they qualify) or the state Hazardous Waste Site Cleanup Fund (HWSCF). The remaining 173 potential sites will be evaluated as staff time is available.

SUPERFUND SITES AND THE HAZARDOUS WASTE SITE CLEANUP FUND

Superfund Sites

The federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) requires states' concurrence prior to listing sites on the National Priority List (NPL), or Superfund list, which makes them eligible for remediation. CERCLA also requires that states: participate in remedy selection, provide payment of 10% matching funds for site cleanups that are financed with Superfund monies, and conduct or oversee operation and maintenance of completed sites.

There are currently ten Superfund sites in Louisiana; five additional sites have been proposed to the NPL, and two of these sites are expected to be added to the NPL during the next year. These Superfund sites are listed on pages 25 and 26.

LDEQ is currently paying 10% matching funds for remediation at one Superfund site (American Creosote), and is conducting long-term operation and maintenance at three Superfund sites (Bayou Bonfouca, Delatte Metals, and Madisonville Wood Preserving). The state is responsible for funding and implementing long-term operation and maintenance at Superfund sites as remedial work is completed, until determined to be no longer necessary through five-year reviews.

Louisiana's revenue source for 10% matching funds for Superfund site cleanups and for site operation and maintenance is the Hazardous Waste Site Cleanup Fund (HWSCF).

Hazardous Waste Site Cleanup Fund

The HWSCF is an indispensable resource of the Underground Storage Tank and Remediation Division (USTRD) for fulfilling its mission to protect the health, safety and welfare of the people and environmental resources of Louisiana. The USTRD uses the HWSCF to conduct statewide identification, investigation, evaluation, containment, control and cleanup of both hazardous and non-hazardous waste sites that have been determined highest priority based on risk to human health and the environment. Sites are prioritized by a numerical ranking system in order to maximize risk reduction in proportion to fund dollars spent. There were 50 eligible inactive and abandoned waste sites on the USTRD HWSCF Prioritization List at the end of FY 2014-15.

However, based on available HWSCF budget, first priority must be given to making federally mandated Superfund State Contract payments (10% match for site remediation) and providing federally mandated long-term operation and maintenance at Superfund sites.

During FY 2014-15, the USTRD used the HWSCF for work performed at 16 sites (USTRD priority sites and Superfund sites). Additional work is needed at USTRD priority sites that have been investigated to remove or treat contamination. The remaining priority sites must also be investigated.

In FY 2015-16, the USTRD is initiating additional site investigations, interim corrective actions, and priority-based corrective actions at confirmed sites, as well as assessments and limited site investigations as needed on potential sites.

For the FY 2017 HWSCF budget, the USTRD is requesting an additional \$615,397 to begin conducting expedited removals and site remediation work at selected high priority sites throughout the state, and to ensure available funding for the American Creosote Superfund State Contract payment.

In future years, additional HWSCF budget will also be required in order to provide 10% state match for EPA-funded cleanups anticipated at four Louisiana Superfund sites (two of the current ten on the NPL, and two of the five proposed to the NPL). Without LDEQ provision of the requisite match funding, EPA cannot utilize Superfund monies to commence site cleanups. As these Superfund sites approach the remedial action phase, budgetary challenges will become significant for LDEQ. Preliminary state match estimates and operation and maintenance costs for Louisiana's Superfund sites over the next five years are provided in the table below.

<i>Requirement</i>	<i>FY 2015 Actual</i>	<i>FY 2016</i>	<i>FY 2017</i>	<i>FY 2018</i>	<i>FY 2019</i>	<i>FY 2020</i>
Remedial Action (10% state match)	\$ 103,609	\$ 120,000	\$ 120,000	\$1,550,000	\$2,900,000	\$2,150,000
Operation and Maintenance (100% state funded)	\$ 670,126	\$ 674,000	\$ 695,000	\$ 695,000	\$ 695,000	\$ 695,000
Total Projected Needs	\$ 773,735	\$ 794,000	\$ 815,000	\$2,245,000	\$3,595,000	\$2,845,000

Figure 3. LDEQ USTRD Cost Projections for Superfund Sites¹

¹ Based on preliminary information from EPA Region 6 and subject to change. Excludes adjustments for inflation.

LIST OF INACTIVE AND ABANDONED CONFIRMED SITES COMPLETED

The table below lists the sites that received No Further Action (NFA) notification during FY 2014-15. Some sites are divided into areas of investigation (AOI) and some AOI's may receive NFA when remediation is completed in those areas.

Parish / Site Name	AI Number	Area of Investigation	Completed Date	Type of Site
<u>Bossier</u> 1				
R360 Environmental Solutions Inc. - Elm Grove Facility - Site Code 0801	88036		Mar-16-2015	Confirmed
<u>Caddo</u> 4				
Moran Galvanizing	5191		Nov-14-2014	Confirmed
Safety Kleen Systems Inc.	23339		Sep-16-2014	Confirmed
Stovall Dirt Pit Disposal Site	44101		Sep-29-2014	Confirmed
