Baton Rouge, LA 70821-4303

RE: City of Zachary Sewer District

Dear Secretary Leggett:

I would like to thank you and your staff for providing the much needed assistance during our planning process. As you are aware the City of Zachary has been working diligently on this process for the past six years. Our goal is to have the City of Zachary be a model city in every aspect. We have expended a substantial amount of resources through the hiring of professionals and other obligations necessary to reach this point.

We have identified the waste water needs for the City of Zachary and the surrounding area. We feel the current parameters that you have set forth in the Louisiana Department of Environmental Quality State Revolving Loan Fund will allow the City of Zachary to construct a model facility for the entire country to emulate.

Please allow this letter to serve as a request for \$37million of the \$120million in the Revolving Loan Fund.

In the coming days I would like to request a meeting with you and your staff to go over detailed plans and a timeline in which to execute these plans.

Sincerely,

Henry J. Martinez
Mayor
