

2006
LOUISIANA WATER QUALITY INVENTORY:
INTEGRATED REPORT

FULFILLING REQUIREMENTS OF
THE FEDERAL CLEAN WATER ACT,
SECTIONS 305(b) AND 303(d)

LOUISIANA DEPARTMENT OF ENVIRONMENTAL QUALITY
OFFICE OF ENVIRONMENTAL ASSESSMENT
WATER QUALITY ASSESSMENT DIVISION
P.O. BOX 4314
BATON ROUGE, LOUISIANA 70821-4314

ACKNOWLEDGEMENTS

The authors wish to thank the Louisiana Department of Environmental Quality (LDEQ), Environmental Surveillance Division regional office staff and the Laboratory Services Division laboratory staff for providing the water quality data without which this report would not be possible. Special thanks are extended to regional surveillance staff members Dwight Bradshaw, Pat Breaux, Kirk Cormier, Bob Crain, David Daigle, Jason Dewitt, Tom Hardaway, Jeff Jackson, Bob Paul, and Matthew Todd, who provide valuable assessment information regarding suspected sources of impairment. Special appreciation is extended to Mary Beth Fleming for her continual great efforts in data entry and technical support of data management.

The *2006 Integrated Report* was edited by Albert E. Hindrichs, under the direction of David Hughes, Environmental Manager, Standards, Assessment and Nonpoint Source Section; Barbara Romanowsky, Administrator, Water Quality Assessment Division; and Mr. Wilbert Jordan, Assistant Secretary, Office of Environmental Assessment. Contributing authors include: Jan Boydstun, Emelise Cormier, Kimberly Cornelison, Kimberly Hamilton-Davis, Ross Hartfield, Paul Heussner, Chris Piehler, Suzanne Rohli, Dugan Sabins, Kristine Pintado, Sue Smith, and Alicia Walsh. John Jennings of the LDEQ Water Quality Assessment Division, Aquifer Evaluation and Protection Section wrote the section on ground water quality. Louisiana Department of Health and Hospitals personnel, including Kenneth Hemphill, Dr. Louise McFarland, Dr. Raul Ratard, and Leslie Le'Mon, were helpful in supplying information necessary for this report. Editorial review was provided by Steph Braden, Alicia Walsh, and Emelise Cormier.

The *2006 Integrated Report* was developed in part through funding provided by the United States Environmental Protection Agency using Clean Water Act, Sections 106 and 319 grant funds and matching state funds.
