Enviroshool webinar on Sewer System reports and Stormwater Management Plans to be held March 4

BATON ROUGE – The Louisiana Department of Environmental Quality is hosting an Enviroshool webinar at 10:00 a.m. Thursday, March 4.

The webinar will provide an overview of the Small Municipal Separate Storm Sewer System (MS4) Annual Reports and a summary of the commonly requested information of each minimum control measure for Small MS4 Stormwater Management Plans.

In addition, information will be provided regarding commonly requested information for U.S. Environmental Protection Agency and LDEQ audits and inspections of medium and large MS4s.

To register for participation in the webinar, send an email to: enviroschool@la.gov.
