  - ERIC User Set-up
  - ERIC Overview
  - Submitting an Inventory Start to Finish
  - ERIC Data Element Terminology and Hierarchy
- Helpful Hints/Important Information
Emissions Inventory (EI) Basics
What is Emissions Inventory?

- The Emissions Inventory is the report used to collect emissions data required by state and federal regulations.
- There are two programs which require emissions data to be collected:
  - Criteria Pollutants
  - Toxic Air Pollutants
**Federal Regulations**

- **Clean Air Act (CAA)** – Section 183 requires a criteria pollutant EI every 3 years for areas of ozone nonattainment.

- **40 CFR Part 51 Subpart A** – Air Emissions Reporting Requirements (AERR) – requires annual EI for point sources of criteria pollutants and EI for nonpoint and mobile sources every 3 years for entire state.
  - Data is submitted by LA to EPA annually.
  - State data is incorporated by EPA into the National Emissions Inventory (NEI).
STATE REGULATIONS

- **LAC 33:III.918 & 919** – requires all point sources in the state to submit a criteria pollutant EI annually

- **LAC 33:III.5107** – requires all point sources in the state to submit a toxic air pollutant EI annually
APPLICABILITY (ALL FACILITIES)

Required to report if facility meets any of the criteria at ANY time during the reporting year

- Located in nonattainment or adjoining parish and emits, has the PTE, or is permitted to emit any criteria pollutant above the threshold values in Tables 1-6 (LAC 33:III.919.A.1.a & 2)

- Located in attainment parish and emits, has PTE, or is permitted to emit any criteria pollutant above the threshold values in Table 7 (LAC 33:III.919.A.1.b & 2)

- Major source of HAPS or TAPS (LAC 33:III.919.A.1.c)

- Holds a Title V (Part 70) permit – regardless of emissions (LAC 33:III.919.A.1.d)

- Holds a portable source permit and operates at any time in a nonattainment or adjoining parish AND meets applicability criteria (LAC 33:III.919.A.1.e)

- Otherwise required by rule or permit to report (LAC 33:III.919.A.1.f)
### Ozone Non-Attainment

</table>
Per Section X of the Minor Source Air General Permit for Crude Oil and Natural Gas Production (MSOG), facilities in a nonattainment area for ozone or an adjoining parish with an MSOG shall submit an EI per LAC 33:III.919

Everyone with an MSOG in the following parishes has to report to EI, regardless of emissions:

- Ascension
- Assumption
- East Baton Rouge
- East Feliciana
- Iberia
- Iberville
- Livingston
- Pointe Coupee
- St. Helena
- St. James
- St. John the Baptist
- St. Martin
- Tangipahoa
- West Baton Rouge
- West Feliciana
WHAT IS ERIC?

- Online emissions inventory reporting tool
  - Detailed data submitted electronically
  - Paper summary statement mailed in to certify electronic submittal
- Accepts both criteria and toxic pollutant emissions inventory data
- Required to be used by the regulations
Thursday
April 30, 2020

- Both a signed certification statement and electronic data must be submitted by April 30 (LAC 33:III.919.F.1.d)
  - If hand-delivering, the certification statement must be stamped on or before April 30 with the stamp at the drop off box
  - If the certification statement comes to us without a date, we will use the date it is received by the Department
- Any requests for coordinate or FacUpdate@la.gov changes received after 4:00pm, April 30th will not be processed until the next business day and will result in a late inventory
CERTIFICATION STATEMENT

- Postmark or ship date determines compliance with the reporting deadline
  - Postmark needs to be prominent
  - Certified mail or tracking can be used as proof of timely submittal
- LDEQ will not accept alternate versions of the certification statement
- Must be an original, wet ink signature signed by a Responsible Official per LAC 33:III.502
  - LDEQ can not accept copies, faxed, or stamped signatures
  - We must be able to verify that the signature is an original, wet ink signature by the Responsible Official
CERTIFICATION STATEMENT

- Only need to send in one original
  - No need for cover letter
  - Check to make sure the Inventory IDs are the same on page 1 and page 2
  - Printing double-sided is preferred
  - Please no staples

- Unless specifically directed, do not need to send us the calculations
**Inactive Facilities**

- EI Reports are required even if a facility is inactive.
- The facility status options are:
  - Permanently Shutdown
  - Idle
  - Permitted but not yet built
- If the facility is active, but a source is idle, the source status should be set to idle. There should be no process records or emissions for that source.
“Once in, Always In” applies to criteria emissions inventories only (LAC 33:III.919.D)

Once a facility no longer meets the applicability in LAC 33:III.919.A.1 for one full calendar year, must request approval in writing to discontinue submitting an EI

Facilities may stop submitting once they have received approval from LDEQ, in writing

Modifications or otherwise removing the requirement from a permit does not qualify as a release from reporting

If you are a major source of TAPs, you are also subject to criteria EI, and therefore subject to “Once In, Always In”
Release from Reporting

- Request for Release from Reporting form is available on our website
- Must be signed by a Responsible Official
- Not currently accepting requests by email or fax
- Must not meet any applicability in LAC 33:III.919.A.1
  - Cannot have a requirement in permit to report
  - Must have submitted last year inventory below thresholds
When there is a change in facility ownership, each owner is responsible to submit and certify their own EI for the period of ownership (LAC 33:III.919.F.2)

The start and end dates of the inventory in ERIC must coincide with the ownership dates in TEMPO

Each owner will have their own ERIC account

Contact your LDEQ staff contact if you would like the previous inventory submitted by the previous owner
Extensions to the reporting deadline may be granted through a variance request. Variance for ERIC Instructions are available on the ERIC website.

Variances must be submitted at least 2 business days before the due date to be considered.

Submittal of the signed Certification Statement determines timeliness regardless of when the data was submitted electronically.

Certification Statements not postmarked on or before the April 30th due date without a variance are considered late and will be referred to Enforcement.
 Coordinate and facupdate@la.gov changes require LDEQ staff review and are not instantaneous

Any requests for coordinate changes or facupdate@la.gov received after 4:00pm, April 30th will not be processed until the next business day.

Any inventories that cannot be submitted on time because of pending facupdate@la.gov and coordinate review/approval issues will be considered late.

It is not necessary to wait until submitting your inventory to request these changes.
Below are the additions/changes that require a request to facupdate@la.gov

- El Billing Party
- El Facility Contact
- Mailing Address
- NAICS or SIC
- Front Gate Coordinates
- Incorrect ownership dates

What to include in facupdate@la.gov emails

- Agency Interest Number
- Facility Name
- Brief description of the change needed
- Name, Address, and Phone number for El Billing Party and El Facility Contact
- Date ranges for which the change should apply (does not apply to Front Gate Coordinate changes)
Changes/additions to release point coordinates will trigger a review and require LDEQ approval.

The coordinate approval process has been expanded to require all release points to be updated.

- Multiple release points should not have the same coordinates (Exceptions to this are general condition, insignificant activities, and fugitive emissions).

- Release point coordinates should not be the same as the front gate coordinates (Exceptions to this are general condition, insignificant activities, and fugitive emissions).
Requests go to the assigned LDEQ staff for your parish

LDEQ will email the user whom submitted the data when the release points are approved/rejected

If you try to submit before changes have been approved, you can still submit, but all changes will be lost.

Step by step instructions are in Section 6.9 of the ERIC User Manual
COORDINATES

- Fugitives, General Condition XVII, and Insignificant Activities should only have one release point ID if the area is the same.

- Guidance for using online sources for coordinates is available on the ERIC Website under Helpful Links and Guidance Documents.

Using Online Sources to Determine Coordinates
LDEQ Emissions Inventory staff are assigned facilities based on facility parish location

A list of parishes and assigned staff is listed on the left sidebar on the ERIC homepage

- ERIC@la.gov will send an email to all EI staff
- Call the EI staff person that is assigned the parish where your facility is located first

Please do not call other LDEQ staff asking for help, even if they have helped in the past

- Please contact EI staff only
- LDEQ staff that are not on the list may not be kept up to date with the most recent changes to EI and/or ERIC
ASKING FOR HELP (CONT.)

Why email before calling?
- Provides more detailed information, and
- Allow us to research the issue aiding in a more complete response

When emailing your staff contact:
- Include the AI #
- Send a screen shot of the error(s) you need help with
- If having problems completing or uploading a spreadsheet, include the spreadsheet
ERIC User Set-up
New Users

1. Create your User Account
2. Request Access to a Facility Account
Before you are able to access facility data in ERIC, you must have an LDEQ Business User Account

- Each person should have his/her own portal account
- User accounts have varying levels of access through different user roles

Create a User Account at the LDEQ Business homepage (different from DEQ ERIC homepage)

- Upon completion of registration, you will receive a screen message confirming your account creation.
- Then you can log in
Discover DEQ E-newsletter

ERIC has been opened for training. Please visit the ERIC Training page for information about training opportunities for the 2017 reporting year.

About the Emissions Inventory Program

The Emissions Inventory Unit of the Air Permits Division is responsible for developing comprehensive criteria and toxic pollutant emissions inventories for the State of Louisiana. The emissions data are used for a variety of planning, regulatory and reporting purposes. The staff works closely with the regulated community, trade groups, and other state and federal agencies to develop and maintain high quality and current emissions data.
Welcome to DEQ Business!

The new DEQ business site is designed to help businesses interact with DEQ in a more efficient manner. We will be expanding the functionality of this site as it becomes available. If this is your first time using the DEQ business website, please start by creating a new account. Existing users please login now.

Louisiana Department of Environmental Quality 612 N. Fifth Street Baton Rouge

Create Account
After logging into the ERIC Business Site, users must request access to specific facility accounts within ERIC.

Associates your user account with specific facilities.

Access to accounts is granted through:

- **Existing Account Administrator** – request is completed in ERIC for administrator to approve in ERIC.
  - You may need to communicate with the existing account administrator to approve your request.
  - LDEQ Staff cannot see or grant these requests.

- **Pre-registration Code** – LDEQ provides code for facilities that have never submitted to ERIC or no longer have an active account administrator.
ERIC USER ROLES

- Reader – Read-only access to your ERIC data
- Manager – Provides editing privileges for ERIC data
  - Edit data, upload inventory data in Excel format, create new inventories, edit existing inventories, and revise old inventories, submit completed inventories
  - Most often the role assigned to consultants
- Administrator – Authority to grant or reject access requests and, if granted, what level of access/role is allowed (most often facility contacts)
Emissions Reporting and Inventory Center

Account Selection

You do not currently have access to any ERIC accounts. Please use the links below to access public emissions data, or to request access to one or more accounts.

- Request access to a Facility (EI submitters, responsible officials, or designated consultants only)
- Manage email notification preferences
- Job Monitor
- Public Reports
- Show Help Topics

**ERIC Version 10.1.0**
Anyone using a pre-registration code is automatically an account administrator

Only facility owners or confirmed employees will be given a pre-registration code

- The Administrator is the only one who can grant/deny access to the account and designate the user role for additional users (e.g., other facility personnel and consultants)
- Multiple administrators can be assigned
- Do not give your pre-registration code to a consultant
- Pre-registration codes can only be used ONE time

If the ERIC Account Administrator is unknown or no longer with the company, please contact your LDEQ assigned staff for further instructions
By default, Account Administrators are emailed when users request access to the facility account in ERIC.

Account Administrators may adjust their email notification preferences to stop receiving these emails.

To approve/reject a request:
- Go to User Administration
- Approve/Reject Outstanding Access Requests
- Edit User Role

Select "Criteria" if you are submitting an inventory pursuant to **LAC 33:III.919**. Select "Toxic" if you are submitting an inventory pursuant to **LAC 33:III.5107**. Select "Criteria and Toxic" if you are submitting an inventory to meet reporting requirements of both regulations. [Click here to access the online text of Title 33 Environmental Regulatory Code.](#)

Correct start and end dates are required for partial inventories resulting from ownership changes. If the ownership start date is within the reporting year, the inventory start date must match the ownership start date before you can submit the inventory. Contact LDEQ if you believe the ownership start date is not correct.

Correct start and end dates are required for partial inventories resulting from ownership changes. If the ownership end date is within the reporting year, the inventory end date must match the ownership end date before you can submit the inventory. Contact LDEQ if you believe the ownership end date is not correct.

Select a year to pull forward into the new inventory as a starting point. Select "None" to create a blank inventory. Note - if you select a base year prior to 2005, any Criteria and Toxic inventories for that year will be combined into a single new inventory for the new reporting year. Also be aware that older inventories may require additional work to meet current data validation standards.

[Save] [Cancel]
FROM START TO FINISH

1. Start New Inventory

2. Edit Inventory
   a. On-Screen Entry
   b. Spreadsheet Upload

3. Review Summary and Run Validations

4. Review Validation Results

5. Submit Inventory

6. Generate and Submit Certification Statement
DATA ENTRY OPTIONS

- On-screen entry – enter data directly into web-based application
- Spreadsheet upload – upload formatted spreadsheet using Microsoft Excel via downloadable template
  - New facilities, create a new inventory and download the blank inventory
  - Download the previous year’s inventory (can be uploaded into next year after revision)
## Data Entry Comparison

<table>
<thead>
<tr>
<th>On-Screen Entry</th>
<th>Spreadsheet Upload</th>
</tr>
</thead>
<tbody>
<tr>
<td>◉ Real time error checking</td>
<td>◉ Error checking is not done until the spreadsheet is uploaded</td>
</tr>
<tr>
<td>◉ Good for small inventories or facilities permitted but not build, idle, or permanently shut down</td>
<td>◉ Good for large inventories</td>
</tr>
<tr>
<td>◉ More time consuming to wait for each page to load/reload</td>
<td>◉ Less time consuming because rows/IDs can be copied from one tab to another</td>
</tr>
</tbody>
</table>

ERIC DATA ELEMENT TERMINOLOGY AND HIERARCHY
Identifier for each specific inventory

- Exactly one record (unique for AI, owner, reporting year, and revision)
- Identifies the reporting period and type of report
**Facility and Contacts**

- **Facility** – Location at which business is conducted – Agency Interest (AI).

- **Contacts** – EI Contact and EI Billing Party are required and must be established through facupdate@la.gov

*Most of the data on these two tabs comes from TEMPO and must be updated through facupdate@la.gov*
Source – Equipment or unit that generates emissions. This is the operating equipment, not the control equipment or the stack/vent.

*Note that piping components, valves, flanges, PRVs, etc. should not be included as individual sources in the inventory.*

- 1 or more records
- One for each source at the facility
Process and Emission Factor

- **Process** – Description of the operational mode and material throughput of a source generating emissions;
  - Includes an SCC and material throughput
  - An emission factor, if used, is related to a Process
  - Insignificant Activities, GC XVII, & Fugitive sources do not require a Process

- **Emission Factor** – Report only if Estimation Method using “Emission Factor” is selected on the Emissions Record
Process and Emission Factor (cont.)

- **Process** – 1 or more records per source
  - One for each mode that the source operated in during the reporting period

- **Emission Factor** – 0 or more records for each Process
  - One for each pollutant for which an emission factor is used to estimate emissions
Control Equipment – Equipment through which emissions are routed for control
- e.g., flare, scrubber, thermal oxidizer
- Report a control system if you used an associated control efficiency in your emissions calculation

Control Efficiency – Required for each control system reported
CONTROL EQUIPMENT AND CONTROL EFFICIENCY (CONT.)

- **Control Equipment** – 0 or more records
  - Not tied to a specific source
  - Associated with a source on the emissions record
  - May be included in one or more emissions paths

- **Control Efficiency** – 1 or more records for each Control System record
  - Specified for each pollutant controlled
**Release Point and Portable Source Location**

- **Release Point** – Physical location where pollutants are released to the atmosphere
  - UTM or lat/long coordinates
  - Stack or area source dimensions

- **Portable Source Location** – Only used to indicate alternate locations at which a portable facility operated and permitted under LAC 33:III.513
  - Typically have permit numbers beginning with 7777
  - Not such items as rental generators that are brought onsite and moved around to different locations in the plant
  - e.g., portable concrete batch plant that can be moved around the state
Release Point and Portable Source Location (cont.)

- **Release Point** – 1 or more records
  - Not tied to a specific source
  - Associated with a source on the emissions record

- **Portable Source Location** – 0 or more records for each release point record
  - Only used to indicate alternate locations at which a portable facility operated
  - Permitted under LAC 33:III.513
  - Not to be used for portable sources at a major source such as diesel generators
**Emissions** – each emissions record identifies and links the amount emitted to the emission’s path

- Emissions path
  - Source, process, control equipment, and release point
- Pollutant
- Emissions type
- Estimation method
- Tons or pounds emitted
**Emissions Path** – Combination of a source, a process, and a release point; may also include a control system

**Emissions Type** – routine, variance, authorized non-routine, startup/shutdown, or unauthorized

**Emission Estimation Methodology** – Method to calculate emissions for each pollutant emitted by a particular process

*CEMS, stack test data, emission factor, engineering judgment*
Emission Types

- **Routine** – Emissions emitted under normal operating conditions. Not restricted to permit limited emissions; e.g., fugitive and area source emissions. Also includes emissions from regulatory permitted activities.

- **Variance** – Emissions emitted through the operations approved by a variance.

- **Authorized Non-routine** – Emissions allowed by rule, statute, variance, or order that are not routine.

- **Startup/Shutdown** – Emissions emitted during startup/shutdown of the emissions path.

- **Unauthorized Discharge** – All other emissions that are not routine, variance, authorized non-routine, or startup/shutdown.
Guidance on how to report emergency engine emissions

- **Maintenance Use** - \( \leq 100 \) hours of permitted non-emergency emissions should be reported as **Routine**

- **Emergency Use** - All use of engines during emergency conditions should be reported as **Authorized Non-routine**

- **Unauthorized Non-Emergency Use** - \( >100 \) hours of non-emergency use of engines, without a variance, should be reported as **Unauthorized**
LAC 33:III.919.F.1.a.ii lists the information to be included in the EI data

List in the regulations is included for reference only and may not be current.

See ERIC User Manual for up to date and comprehensive information (link on ERIC homepage)
HELPFUL HINTS / IMPORTANT INFORMATION
Facility-generated IDs

- Up to 6 alpha-numeric characters
- For Source, Process, Control System, and Release Point, and Portable Source Location
- Must be unique for each ID type
- **Must remain the same** for each item over time
- For changes in ownership, new owners should request the previous owner’s most recent inventory to keep IDs consistent
The data should be in a state that you are willing to certify at the time of submission

- Certification statement holds you criminally liable for information in the inventory

- LAC 33:III.919.G requires emissions to be reported using CEMS data or approved stack testing data.
  - Only in the absence of CEMS or stack test data are you allowed to use emissions factors
  - Emission factors must be those as of December 31 of the reporting year
  - Used for the entire reporting year
  - Do not use the same calculation methods in your permit unless they meet LAC 33:III.919.G
If AP42 changes increase emissions above permit limit

- Submit permit modification
- Contact enforcement to ensure a compliance reconciliation is done

For more information, contact enforcement:

- Your usual enforcement contact, or
- Maggie Turner  225-219-3735
In addition to criteria pollutants, facilities located in the following parishes are also required to submit HRVOC data for ethylene and propylene (LAC 33:III.919.F.1.a.i):

- Ascension
- East Baton Rouge
- Iberville
- Livingston
- St. Charles
- St. John the Baptist
- St. James
- West Baton Rouge

LAC 33:III.919.F.1.a.iii has additional requirements for facilities in ozone nonattainment areas:

- Ozone season average daily emissions of CO, NOx, VOC, ethylene, & propylene
- Average ozone season throughput
- Ozone season average heat content
- Ozone season estimation method for CO, NOx, VOC, ethylene, & propylene
Criteria and HRVOC pollutants are reported in tons
- Two decimal places minimum, recommended
- Not required to report emissions < 0.005 tons (potential & actual) for an emissions path

Toxics are reported in pounds
- Two decimal places minimum, recommended
  - 3 decimal places if Minimum Emission Rate < 50 lbs/yr, and
  - 6 decimal places for dioxins and furans
- Not required to report emissions < 0.0005 tons or 1 pound (potential & actual) for an emissions path, except for dioxins and furans which has a Minimum Emission Rate (MER) of 0.0001 lbs/year
NAICS/SCC Updates

- Review your NAICS and SCC
  - The full, current EPA SCC table is provided with instructions on how to identify the correct SCC for your process on the LDEQ Homepage as *EPA Source Classification Codes (SCC)*.
  - NAICS and SCC have been updated in ERIC to match acceptable EPA codes.

- EPA has started comparing ERIC descriptions for sources and processes against SCC to identify facilities for further investigation:
  - Refineries that don’t show any tank SCC.
  - Sources described as one thing with an SCC for another, e.g. a source description of internal floating roof tank, but the SCC for a Pipeline Vent.

- EPA uses SCC to determine rule applicability impacts (among other things).
GROUPING SIMILAR SOURCES

- May group similar sources/process if, in aggregate, emissions (potential & actual) are
  - < 5 tons Criteria Pollutants
  - < Minimum Emission Rate for Toxic Air Pollutants
- Create an emissions path for the group
  - Source, process, release point
GENERAL CONDITION XVII
Emissions

- May aggregate GC XVII
  - By Permit (not facility-wide)
  - Do not combine with Insignificant Activities or Fugitives

- Report as source type of GC XVII Emissions

- Report as release point type of Area with dimensions of area where activity occurs

- Does not require a process record
INSIGNIFICANT ACTIVITIES

- May aggregate Insignificant Activities
  - By Permit (not facility-wide)
  - Do not combine with GC XVII or Fugitives
- Report as source type of Insignificant Activities
- Report as release point type of Area with dimensions of area where activity occurs
- Does not require a process record
- Report Insignificant Activity Lists A and D
- Do not report Insignificant Activity Lists B or C
Fugitives

- May aggregate Fugitives
  - By Permit (not facility-wide)
  - Do not combine with insignificant activities or GC XVII
- Report as source type of Fugitive Emissions
- Report as release point type of Fugitive with dimensions of area where activity occurs
- Does not require a process record
CAPs are a function of permits and should not be represented in the inventory as a CAP

- All the equipment in the CAP should be reported individually as sources, processes, release points, and/or control systems
- Do not represent CAPs as area sources or release points
- Rule of thumb – how you calculate your data is how you should represent it in the inventory
ERIC Users Manual is available

- Comprehensive & detailed
- Will be updated as needed

Let us know if something is missing or incorrect!
We keep a running list of bugs and suggested improvements throughout the reporting period.

Email comments and additional suggestions to Eric@la.gov.
THANK YOU FOR YOUR ATTENTION

**Change Account:**

- **Choose One...**

ERIC Version 10.1.0
Do not need a portal account nor an ERIC account to access the Public Reports page

Three options:

- Radius Search
  - Actual Emissions radius search:
    - Certified emissions data from ERIC
    - Last 5 years plus baseline data
  - Permitted emissions radius search:
    - Permitting data from TEMPO
    - Current operating permits only (not pending permit applications)

- Emissions by Parish
- Prior years data set
PORTABLE SOURCES

- If a portable source operates in a nonattainment or adjoining parish at **any time during the reporting year** and meets the applicability of LAC 33:III.919.A.1.a, then they must report to EI (LAC 33:III.919.A.1.e)
  - Refers to portable sources with permits issued in accordance with LAC 33:III.513, permit number usually begins with 7777
  - Does not apply to portable equipment located at a stationary source

- If a portable source must report to EI, then they must report for the entire period of ownership during the reporting year (LAC 33:III.919.F.1.d.iii)
If your AI is contiguous to another AI, as defined in LAC 33:III.919.E, then applicability is determined by a threshold value that is the greater of (LAC 33:III.919.B):

- the sum of actual emissions,
- the sum of the potentials to emit; or
- the sum of permitted emissions for ALL contiguous AIs
- Each AI shall report an EI separately
If your AI is in an area that was nonattainment and EPA designates as Attainment, the AI shall continue to be subject to reporting until otherwise directed (LAC 33:III.919.C)

If your AI is in an area that changes from attainment to nonattainment following designation by EPA, you will be required to report after the first full year of designation (LAC 33:III.919.F.1.d.i & ii)

For example, St. Bernard Parish was designated nonattainment for the 2010 primary 1-hour sulfur dioxide (SO2) National Ambient Air Quality Standard (NAAQS) of 75 parts per billion (ppb) on October 4, 2013. Facilities in St. Bernard Parish and its adjoining parishes were not required to report until 2015 when they reported their 2014 emissions
The EI must include all emissions from the facility (LAC 33:III.919.F.1.b)

- The only emissions that are exempt are Insignificant Activities on Lists B & C in LAC 33:III.501.B.5

- There are no facility classes or categories exempt from EI reporting (LAC 33:III.919.D.2)

- Special Inventories – LAC 33:III.919.F.3

- Calculations (CEMS vs. AP-42)– LAC 33:III.919.G

- Fees – LAC 33:III.919.I
