Brownfields Small Technical Assistance Grant

- Small Technical Assistance Grants created to help small communities, Indian tribes, rural areas and disadvantaged communities lay the groundwork to address Brownfield sites.

- Technical Assistance to the target community can include parcel-based, GIS-mapped brownfield inventory, support community engagement efforts, and facilitate visioning and planning efforts.

What are Brownfields?

Brownfields in rural communities can take on various forms, and their appearance may differ from those in urban or industrial areas. While rural brownfields share common characteristics with their urban counterparts, they often have distinct features due to the rural setting.
