**CONSOLIDATED**  
**COMPLIANCE ORDER & NOTICE OF POTENTIAL PENALTY**

The following **CONSOLIDATED COMPLIANCE ORDER & NOTICE OF POTENTIAL PENALTY** is issued to **BARNETTE & BENEFIELD, INC (RESPONDENT)** by the Louisiana Department of Environmental Quality (the Department), under the authority granted by the Louisiana Environmental Quality Act (the Act), La. R.S. 30:2001, et seq., and particularly by La. R.S. 30:2025(C), 30:2050.2 and 30:2050.3(B).

**FINDINGS OF FACT**

I.

The Respondent (Agency Interest No. 5381) owns and/or operates Barnette & Benefield, Inc, a general contractor, located at 1600 Hudson Street in Haynesville, Claiborne Parish, Louisiana. The Respondent was contracted by the Town of Haynesville (the town) to demolish the building known to the Department as the Old Fred's Building (the building) previously located at 1863 Main Street in Haynesville, Claiborne Parish, Louisiana (the demolition site, Agency Interest No. 209680).

II.

On or about November 14, 2017, the Department received an anonymous complaint (Incident No. T-181337) which reported a building being burned that contained asbestos. The Department received a second complaint (Incident No. T-181391) on November 21, 2017, in which the complainant reported the building was torn down a couple of weeks ago and later burned. On or about November 15, 2017, and

December 1, 2017, inspections were conducted at the demolition site to investigate the complaints. On or about March 9, 2019 the Department issued a Warning Letter (WL) to the Respondent for the inspections conducted on November 15, 2017, December 1, 2017, and February 19, 2019. The Respondent submitted a response to the WL on or about April 9, 2019.

### III.

During the November 15, 2017 inspection, the Department's inspector observed evidence of a burning building, including smoke from the active burning of construction and demolition (C&D) debris. No standing building was observed at the time of this inspection. During a telephone conversation, on or about November 17, 2017, with a representative of the town, the Department's inspector was informed that an asbestos inspection of the building was not conducted prior to the demolition activity, the Respondent was contracted to demolish the building, and the Haynesville Fire Department did a practice burn on November 8 or 9, 2017. During the November 17, 2017 telephone conversation, the Department's inspector informed the representative of the town that all remaining C&D debris located at the demolition site must be disposed of properly in a permitted landfill. Additionally, the Department has no record of receiving an Asbestos Notification of Demolition Form (AAC-2) prior to the demolition of the building located at the demolition site. The Department's inspector was informed the fire at the demolition site was extinguished on November 15, 2017.

### IV.

On or about November 28, 2017, the Department's inspector spoke with the complainant who stated the burned debris was being hauled off and dumped at another location. During the Department's follow-up inspection conducted on or about December 1, 2017, it was discovered the C&D debris from the building was being dumped at a remote oilfield storage tank site, Energy Reserves Group – Sales #3, located in section 31, township 23N, range 7W in Haynesville, Claiborne Parish. This location is known to the Department as the Sale-Stinson unauthorized dump site (the dump site, Agency Interest No. 215933). Approximately fifty (50) to sixty (60) loads of C&D debris were located at the dump site. According to a representative of the town, the owner of the dump site gave the town permission to dump the debris material on their property. Additionally, a follow-up inspection of the demolition site revealed a significant amount of C&D debris had been removed since the Department's November 15, 2017 inspection. However, pieces of C&D debris and burned material remained scattered at the demolition site.

V.

On or about November 30, 2017, Altec Environmental Consulting, LLC (Altec) conducted a limited asbestos assessment inspection of the C&D debris that remained at the demolition site. On or about December 13, 2017, the Department was informed that laboratory analysis of the samples revealed eight (8) of the twenty-one (21) bulk samples were positive for asbestos.

VI.

According to LAC 33:III.5151.F.1.d, if a facility is demolished prior to an asbestos inspection or notification, then all debris at the site is categorized as asbestos-contaminated debris (ACD) which contains regulated asbestos-containing material (RACM), unless the owner/operator affirmatively demonstrates there is no asbestos-containing material (ACM) in the debris. Under these circumstances, the Department has determined all the debris located at the demolition site and the dump site to be ACD.

VII.

The Department conducted follow-up inspection on or about August 23, 2018 and February 19, 2019, at the demolition site. At the time of these inspections, pieces of C&D debris and burned material remained scattered at the demolition site.

VIII.

On or about, November 15, 2017, December 1, 2017, August 23, 2018, and February 19, 2019, the Department conducted inspections of the demolition and dump sites to determine the degree of compliance with the Act and the supporting Regulations. While the investigation by the Department is not yet complete, the following violations were noted during the course of the inspections:

- A. The Respondent caused and/or allowed the deposition of regulated solid waste without a permit and/or other authority from the Department, in violation of La. R.S. 30:2155 and LAC 33:VII.315.C. Specifically, the Respondent deposited the C&D debris from the demolition site at the dump site, which is not authorized to receive solid waste. Additionally, any C&D waste that remains at the demolition site is considered disposed. The demolition site is not authorized to receive solid waste.
- B. The Respondent transported solid waste to a facility not permitted to receive such waste, in violation of LAC 33:VII.505.D. Specifically, the Respondent transported the C&D debris from the demolition site to the dump site, which is not authorized to receive solid waste.

- C. The Respondent failed to notify the Office of Environmental Services, within thirty (30) days, of its activities as a solid waste transporter, in violation of LAC 33:VII.401.A. Specifically, the Respondent transported fifty (50) to sixty (60) loads of C&D debris consisting of partially burned building materials, including floor tiles, insulation, roofing material, and metal, mixed with bricks and concrete. The Respondent is not an authorized solid waste transporter.
- D. Prior to the commencement of a demolition activity, the Respondent must either assume RACM is present or thoroughly inspect the affected facility for the presence of asbestos. Specifically, during the telephone conversation held on November 17, 2017, the representative of the town stated an asbestos inspection was not conducted before demolition of the building began. The failure to thoroughly inspect the building for asbestos prior to demolition activities is a violation of LAC 33:III.5151.F.1 and La. R.S. 30:2057(A)(2).
- E. The Respondent failed to notify the Department prior to the demolition of the building located on the demolition site. On or about November 6, 2017, demolition began and no asbestos renovation and demolition form AAC-2 was received by the Department prior to the demolition activity. Additionally, the Respondent did not provide the Office of Environmental Services with typed notice of intention to demolish by submitting the AAC-2 Form and applicable fees. The Department has no record of receiving an AAC-2 for this demolition activity. The failure to notify the Department prior to the demolition on the demolition site, by submitting the AAC-2 along with applicable fees, is a violation of LAC 33:III.5151.F.2.a, LAC 33:III.5151.F.1.i, and La. R.S. 30:2057(A)(2).

### **COMPLIANCE ORDER**

Based on the foregoing, the Respondent is **hereby ordered**:

- D. To use personnel accredited and/or authorized by the Department for all removal of the ACD to a recognized asbestos landfill (RAL), including but not limited to, Asbestos Abatement Workers and Asbestos Abatement Contractor/Supervisor, in accordance with LAC 33:III.5151.F.3.h and LAC 33:III.5151.P.2.
- E. To use a waste transporter that is recognized by the Department to transport ACD and Asbestos-Containing Waste Material (ACWM) from the demolition site and the dump site to a RAL, in accordance with LAC 33:III.5151.J. The ACWM transported from the demolition site and the dump site shall be handled as described in LAC 33:III.5151.J.4.

- G. To notify the Department through written correspondence in accordance with LAC 33:III.5151.F.3.m, within twenty-four (24) hours after the debris has been removed and the work areas have been cleaned at both the demolition site and the dump site in accordance with LAC 33:III.5151.F.3.l.
- H. To submit to the Enforcement Division, within fifteen (15) days of disposal, receipts documenting the proper disposal of the waste from the demolition site and the dumpsite at a permitted disposal facility. The removal and disposal of this waste shall be in accordance with all applicable Solid Waste Regulations, and Air Quality Regulations, including but not limited to, LAC 33:III.5151.
- I. To remove and dispose, all ACWM located at demolition site and the dump site to a permitted or authorized solid waste disposal facility that is a RAL, within sixty (60) days after receipt of this **COMPLIANCE ORDER**. Any debris shall only be removed with permission of the property owners.

#### VI.
