**CONSOLIDATED  
COMPLIANCE ORDER & NOTICE OF POTENTIAL PENALTY**

The following **CONSOLIDATED COMPLIANCE ORDER & NOTICE OF POTENTIAL PENALTY** is issued to **CLARIANT CORPORATION (RESPONDENT)** by the Louisiana Department of Environmental Quality (the Department), under the authority granted by the Louisiana Environmental Quality Act (the Act), La. R.S. 30:2001, et seq., and particularly by La. R.S. 30:2025(C), 30:2050.2 and 30:2050.3(B).

**FINDINGS OF FACT**

**I.**

The Respondent owns and/or operates an oil services product storage and distribution center located at 304 Ida Road in Broussard, Lafayette Parish, Louisiana. The facility repacks finished products for use in oil field production facilities. The Respondent notified the Department as a Large Quantity Generator (LQG) of Hazardous Wastes and operates under EPA Identification No. LAR000053413. Based on the information contained in the 2021 Hazardous Waste report submitted by the Respondent to the Department, the Respondent is a small quantity handler of universal waste. The Respondent was granted authorization under Louisiana Pollutant Discharge Elimination System (LPDES) General Permit LAG531799 effective on February 21, 2018 with an expiration date of November 30, 2022. LPDES Permit has been administratively continued. Under the terms and conditions of LPDES General Permit LAG531799, the Respondent is permitted to discharge treated sanitary wastewater into Cypress Bayou

via local drainage, thence into Bayou Tortue, all waters of the state. Effective January 30, 2015, the Respondent was automatically covered under the Louisiana Sewage Sludge and Biosolids Use or Disposal General Permit LAJ660000. The Respondent does not have authority from the Department to discharge industrial stormwater runoff to waters of the state.

## II.

On or about May 2, 2022, the Department conducted an inspection of the above referenced facility to determine the degree of compliance with the Act and the applicable Louisiana Hazardous Waste and Water Quality Regulations. While the investigation is not yet complete, the following violations were noted during the course of the inspection and subsequent file review on or about November 16, 2022:

- A. The Respondent failed to keep containers holding hazardous waste closed at all times, except when it is necessary to add or remove waste, in violation of LAC 33:V.1015.B.1.d.i. Specifically, the inspection revealed that two (2) 275-gallon capacity totes observed in one of the less than 90-day hazardous waste container storage areas were open. The rings and bolts for the drum lids were not being used. The totes were labeled hazardous waste and contained Solvtreat, Foamtreat, and Hytreat D001 hazardous waste. Also noted during the inspection, in the less than 90-day hazardous waste container storage area located in the laboratory, were two (2) 55-gallon drums containing heptane, hexane, and acetone D001 hazardous waste with open bungholes. The SDS provided for the materials revealed that they all have a flashpoint of less than 140°F (D001). During the inspection, the facility representative closed all of the open containers.
- B. The Respondent accumulated/stored hazardous waste on-site for more than ninety (90) days without interim status or a standard permit, in violation of LAC 33:V.1015.B and LAC 33:V.303.B. Specifically, during the May 2, 2022 inspection, two (2) totes in the less than 90-day hazardous waste storage area labeled hazardous waste were being stored for more than ninety (90) days. The accumulation start dates on the totes were September 1, 2020, July 21, 2021, and January 28, 2022.
- C. The Respondent failed to determine if generated solid waste is a hazard, in violation of LAC 33:V.1005.A. Specifically, during the inspection, a spill was observed in the facility's 20,000 gallon tank farm. According to a representative of the Respondent, the only material stored in the 20,000 gallon tank farm is Hytreat. The Hytreat safety data

sheet (SDS) provided by the Respondent's representative revealed the material has a flashpoint of less than 73°F, indicating a potential hazardous waste. A hazardous waste determination was requested for the spilled material at the time of the May 2, 2022 inspection. As of December 12, 2022, the Respondent has not yet provided documentation indicating the hazardous waste determination was performed. Additionally, two (2) 55-gallon drums labeled "soap sticks," were observed at the facility. The Respondent has not yet determined if the material labeled "soap sticks" is hazardous waste.

- D. The Respondent failed to demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received, in violation of LAC 33:V.3825.C. Specifically, at the time of the inspection, a closed box of waste lamps was observed, but the box was not labeled with an accumulation date.
- E. The Respondent failed to keep containers holding hazardous waste closed at all times during accumulation at or near the point of generation where the waste initially accumulates, except when it is necessary to add, remove, or consolidate waste, in violation of LAC 33:V.1011.A.4. Specifically, the inspection revealed one (1) 55-gallon drum containing still bottoms generated from the solvent recovery process at the satellite accumulation area in the tote rinsing unit was open.
- F. The Respondent failed to mark or label containers accumulating hazardous waste located at or near the point of generation where the waste was initially accumulated with the words "Hazardous Waste" and with an indication of the hazards of the contents, in violation of LAC 33:V.1011.A.5.a and LAC 33:V.1011.A.5.b. Specifically, the 55-gallon drum holding still bottoms generated from the solvent recovery process at the satellite accumulation area was not labeled with the words "Hazardous Waste," nor an indication of the hazards of the contents.
- G. The Respondent failed to notify the Office of Environmental Services within seven (7) days when any of the information submitted in the Notification of Hazardous Waste Activity Form (HW-1 Notification Form) changed, in violation of LAC 33:V.1017.A. Specifically, the Respondent installed a new tank wash system but did not reflect the Hazardous Secondary Material Activity (HSM) in the HW-1 Notification Form submitted to the Department on or about February 13, 2015. On or about June 6, 2022,

the Respondent submitted an updated HW-1 Notification form, which included the HSM activity.

- H. The Respondent failed to have a Waste Minimization Plan certified by a Louisiana registered Professional Engineer in accordance with LAC 33:V.2245.J, in violation of LAC 33:V.1015.B.9. Specifically, the waste minimization plan provided by the Respondent's representative via email on or about June 27, 2022 was not certified by a professional engineer. On or about August 10, 2022, the waste minimization plan provided by the Respondent was signed and certified by a Louisiana registered professional engineer.
- I. The Respondent failed to implement the Spill Prevention and Control (SPC) plan. Specifically, at the time of the May 2, 2022 inspection, the Department observed a spill collection pit within the "Bulk Loading/Unloading Area" whose capacity was approximately ninety-five percent (95%) full (Inspection Report, Photographs 1 & 2 of 24). The facility's SPC plan states that the Spill Collection Pit has a capacity of 60 gallons. The Respondent failed to maintain the Spill Collection Pit in accordance with the SPC plan in violation of (Section 3.2, Loading/Unloading Operations), La. R.S. 30:2076(A)(3) and LAC 33:IX.905.B. A representative of the Respondent stated that the accumulation in the collection pit occurred over at least six (6) months.
- J. The Respondent failed to comply with Sewage Sludge and Biosolids Use or Disposal General Permit LAJ660000. Specifically, the Respondent failed to submit the annual Sewage Sludge Reporting Form for 2017, 2018, 2019, 2020, and 2021. The failure to submit the annual Sewage Sludge Reporting Form is in violation of Sewage Sludge and Biosolids Use or Disposal General Permit LAJ660000 (Part II, Section C.3 and Part III, Section A.2), La. R.S. 30:2076(A)(3), and LAC 33:IX.7313.A.2.
- K. The Respondent caused and/or allowed the discharge of industrial stormwater runoff from its facility to waters of the state without authority from the Department. The unauthorized discharge of industrial stormwater runoff to waters of the state is a violation of La. R.S. 30:2075.
