NOTICE OF INTENT

**Department of Environmental Quality
Office of the Secretary
Legal Affairs Division**

**UST Grant Program
(LAC 33:XI.Chapter 14)(UT20)**

Under the authority of the Environmental Quality Act, R.S. 30:2001 et seq., and in accordance with the provisions of the Administrative Procedure Act, R.S. 49:950 et seq., the secretary gives notice that rulemaking procedures have been initiated to amend the Underground Storage Tanks regulations, LAC 33:XI.Chapter 14 (UT20).

This Rule provides financial assistance in the form of reimbursement grants to eligible private persons or entities with the costs necessary in upgrading and/or improving single wall underground storage tank systems to the

standards outlined in LAC 33:XI.303. These proposed regulations establish requirements, procedures, and processes for owners of single wall underground storage tank systems registered with the department to be eligible for the grants. The adoption of the proposed regulations would assist in upgrading and/or improving single wall underground storage tank systems to a system that is more protective of the state's environment.

During the 2022 Regular Session, House Bill 1035 was introduced to require the Department of Environmental Quality to establish procedures to provide for reimbursement grants for upgrades and/or improvements to single wall underground storage tank (UST) systems. The department has documented numerous releases from single wall UST and upgrading these type of systems to the standards outlined in LAC 33:XI.303 will likely result in fewer releases and be more protective of the state's environment. House Bill 1035 was signed into law as Act No. 277. The basis and rationale for this Rule are to protect the waters and land of the state from petroleum releases occurring from single wall UST systems. This Rule meets an exception listed in R.S. 30:2019(D)(2) and R.S. 49:963.B(3); therefore, no report regarding environmental/health benefits and social/economic costs is required.

FISCAL AND ECONOMIC IMPACT STATEMENT FOR ADMINISTRATIVE RULES

RULE TITLE: UST Grant Program

I. ESTIMATED IMPLEMENTATION COSTS (SAVINGS) TO STATE OR LOCAL GOVERNMENT UNITS (Summary)

The proposed rule will increase costs to the department by providing financial assistance in the form of reimbursement grants to eligible private persons or entities in the costs necessary in upgrading and/or improving single wall underground storage tank systems to the standards outlined in LAC 33:XL303. These proposed regulations establish requirements, procedures, and processes for owners of single wall underground storage tank systems registered with the department to be eligible for the grants. The adoption of these regulations would assist in upgrading and/or improving single wall underground storage tank systems to a system that is more protective of the state's environment.

The proposed rule to establish the Underground Storage Tank (UST) Grant Program will be funded by the cost recovery efforts and interest earned on the Tank Trust Account (Interest Account) in accordance with R.S. 30:2195.2. No single grant shall exceed \$150,000 and the total amount of grants per year shall not exceed \$3,000,000. The department plans to implement this program initially with current staff and resources. Should the additional work for continued implementation be overly onerous, additional staff and resources may be necessary. The increased workload is indeterminable at this time.

II. ESTIMATED EFFECT ON REVENUE COLLECTIONS OF STATE OR LOCAL GOVERNMENTAL UNITS (Summary)

There is no anticipated effect on revenue collections of state and local governmental units from this proposed rule.

III. ESTIMATED COSTS AND/OR ECONOMIC BENEFITS TO DIRECTLY AFFECTED PERSONS, SMALL BUSINESSES, OR NONGOVERNMENTAL GROUPS (Summary)

The proposed rule will establish procedures for each eligible applicant to apply for a reimbursement grant to provide financial assistance in upgrading and/or improving single wall underground storage tanks (USTs). No single grant shall

exceed \$150,000. While the costs to upgrade and/or improve single wall USTs will likely exceed \$150,000, the proposed rule will provide a financial incentive for applicants to install a UST system that is more protective of the state's environment. Due to the anticipated participation, the proposed rule may increase demand for persons or small business that provide services to USTs.

IV. ESTIMATED EFFECT ON COMPETITION AND EMPLOYMENT (Summary)

The proposed rule is anticipated to increase demand for persons or small business that provide services to USTs therefore resulting in increased competition and employment opportunities within the state.
