

STATE OF LOUISIANA
DEPARTMENT OF ENVIRONMENTAL QUALITY

IN THE MATTER OF
SEVERE STORMS AND TORNADOES MARCH 22, 2022

AGENCY INTEREST NO. 230261

DECLARATION OF EMERGENCY AND ADMINISTRATIVE ORDER

Pursuant to the authority granted to me by Louisiana Revised Statutes 30:2001 *et seq.*, and particularly La. R.S. 30:2033 and 2011(D)(6), I hereby make the following findings, declaration and order:

FINDINGS AND DECLARATION

1. On the **22nd** day of **March, Severe Storms and Tornadoes March 22, 2022** (hereinafter "the **EVENT**") adversely impacted the State of Louisiana, causing widespread damage. The National Weather Service reported that one or more tornadoes touched down in the greater New Orleans area with further reports of a tornado in St. Tammany Parish.
2. By State of Louisiana Proclamation No. 49 JBE 2022, Louisiana Governor John Bel Edwards, pursuant to the Louisiana Homeland Security and Emergency Assistance and Disaster Act, La. R.S. 29:271 *et seq.*, declared on **March 22, 2022**, that a state of emergency exists in the state of Louisiana, as the event caused significant damage and power outages throughout southeast Louisiana with at least one confirmed fatality.
3. St. Tammany Parish, St. Bernard Parish, Orleans Parish and Jefferson Parish shall constitute the specific areas covered by this Declaration of Emergency and Administrative Order (hereinafter "Order"). These areas shall herein be referred to as the "Emergency Areas."
4. I find that the **EVENT** has created or will create conditions that require immediate action to prevent irreparable damage to the environment and serious threats to life or safety throughout the Emergency Areas.

WHEREFORE, I hereby declare that an emergency exists, and that the following measures are necessary to prevent irreparable damage to the environment and serious threats to life or safety throughout the Emergency Areas.

ORDER

The Emergency Areas shall include the following parishes:

St. Tammany Parish, St. Bernard Parish, Orleans Parish and Jefferson Parish.

Within this emergency area, the following applies:

§ 1. **Solid Waste Management**

- a. State of Louisiana "Comprehensive Plan for Disaster Clean-up and Debris Management," (the Debris Management Plan)

When handling and managing wastes generated as a result of the **EVENT**, owners and operators of solid waste management facilities and local governments shall adhere to the Debris Management Plan, except where the Debris Management Plan may be in conflict with the provisions of this Order, in which case the provisions of this Order shall prevail. The Debris Management Plan contains provisions and instructions for handling various types of waste material and for locating and receiving authorization for Emergency Debris Sites. A copy of the Debris Management Plan can be obtained via LDEQ's website at the following link,

<http://deq.louisiana.gov/page/disaster-debris-management>.

- b. Permitted Solid Waste Management Facilities

- i. Owners and operators of solid waste management facilities permitted by the Department before the **EVENT** are authorized to make all necessary repairs to restore essential services and the functionality of storm water management and leachate collection systems damaged by the **EVENT**, without prior notice to the Department. Within thirty (30) days of commencing the work of such repair or replacement, however, the permittee shall notify the Department in writing, describing the nature of the work, giving its location, and providing the name, address, and telephone number of the representative of the permittee to contact concerning the work.

- ii. Permitted facilities within or outside of the Emergency Area, which accept **EVENT**-generated debris in accordance with the terms of this Order, may accept **EVENT**-generated debris for disposal or storage without the need to first modify existing permits, as follows:

(1). Prior notification is submitted to the Department describing any proposed deviations from permit conditions;

(2). Any proposed deviations from permit limits must be within the bounds of engineering assumptions used in the design of the facility, and conducted in accordance with the Debris Management Plan; and

(3) Written approval by the Department (including electronic mail) of the proposed deviations is received.

iii. Operators of permitted facilities may request extended hours of operation and increased solid waste acceptance rates to facilitate recovery and clean-up efforts. The Department may approve such requests for the duration of the Order without the need for a permit modification.

iv. Operators of permitted facilities approved for permit deviations under this Order may be required to submit application for modifications of their existing permits to address any long-term impacts of accepting **EVENT**-generated debris on operations and closure that are not addressed in existing permits if it is determined long term impacts will result from these activities. Long-term impacts are those that will extend past the expiration date of this Order. The requests for modification shall be submitted no later than six (6) months after the date the Governor declared the emergency, unless otherwise extended by the Department. No permit fee will be required for any modifications necessitated solely by the clean-up activities resulting from the **EVENT**. The Department may, for good cause shown, issue a temporary authorization pursuant to LAC 33:VII.509.B.1.a for activities that are addressed in a permit modification request as provided for in this subsection, to authorize operations after expiration of this Order, pending a decision on the modification request.

v. White goods (e.g., air conditioners, stoves, range tops, refrigerators and freezers from which food has been removed) shall be stored in an area separate from other solid wastes and in a manner that prevents vector and odor problems. No white goods may be stored in or on any permitted landfill cells that have not undergone final closure and have not received written authorization from the LDEQ specifically allowing storage in that area. All white goods shall be removed from the storage facility or staging area and sent offsite for recycling, or recycled onsite, within ninety (90) days of initial receipt at the site.

c. Emergency Debris Sites

i. Upon the declaration of an emergency by LDEQ and the issuance of this Order, local governments and state agencies may "activate" a pre-approved emergency debris site. Upon activation, the governmental body shall notify LDEQ Headquarters via the debris hotline (225-364-7901) that the site is being activated. This verbal notification shall occur as soon as practicable depending on communication

capability. If LDEQ Headquarters does not have communication capability, please call one of LDEQ's regional offices listed in Appendix A.

Written notification (Written Notification of the Activation of Pre Approved Emergency Site) shall be sent to the LDEQ Regional Manager and the LDEQ Headquarters within five (5) days of verbally activating the site, or as soon as mail delivery is possible. A copy of the form is contained in the Debris Management Plan or can be obtained via LDEQ's website at the following link:

<http://deq.louisiana.gov/page/disaster-debris-management>.

LDEQ Headquarters address is as follows: Waste Permits Division, Louisiana Department of Environmental Quality, Post Office Box 4313, Baton Rouge, LA 70821-4313 or fax (225) 325-8236 or email deqdebrisrequest@la.gov.

ii. New temporary emergency debris sites may be considered in accordance with procedures contained in the Debris Management Plan. Authorizations may be requested by providing a notice to the Department on approved forms (Emergency Debris Site Request Form). The request forms can be obtained via LDEQ's website at the following link:

<http://deq.louisiana.gov/page/disaster-debris-management>.

New temporary emergency debris sites can be requested as follows:

- (1). Emailing a completed request form to deqdebrisrequest@la.gov;
- (2). Faxing a completed request form to (225) 325-8236, or
- (3). If a request form is not immediately available, the local government can call the emergency debris hotline at (225) 364-7901, and provide the information over the phone to receive verbal approval to stage. The verbal request shall be followed up with a written request as soon as possible after mail delivery is available but no later than 21 days after verbal approval is given.

iii. All temporary and activated pre-approved emergency debris sites accepting vegetative debris shall submit completed weekly debris management report (WDMR) forms to the Department each week, no later than Sunday, during operations until the debris site is completely closed or deactivated and the final report has been submitted in accordance with the Debris Management Plan. A copy of the WDMR form is contained in the Debris Management Plan or can be obtained via LDEQ's website at the following link,

<http://deq.louisiana.gov/page/disaster-debris-management>.

d. Construction and demolition debris generated from residential structures of four units or less that are subject to a government-ordered demolition shall be disposed of in accordance with the Debris Management Plan except Regulated Asbestos Containing Material (RACM) shall be disposed of in a Type I/II landfill. A request by a landfill owner or operator for authorization to accept such RACM must include

a certification that the owner or operator will manage the RACM in accordance with the landfill's QA/QC plan and LDEQ requirements. See Section 5.a, *Asbestos Clean-up*, of this Order, for additional information on receiving RACM in Type I and II landfills. The Department will provide a written response to the request for authorization to accept solid waste and asbestos containing waste material in a Type I or II landfill.

§ 2. Hazardous Waste

a. In accordance with the Debris Management Plan, hazardous waste generated as a result of the **EVENT** must be separated from other **EVENT**-generated waste and disposed of at a permitted hazardous waste disposal facility.

b. A blanket approval of time extensions under LAC 33:V.1109.E.2 and 1109.E.9 is necessary within the Emergency Areas for hazardous waste generators for the storage of their hazardous wastes on site, pending the cleanup of the **EVENT**-related damage and restoration of essential services. The rules authorize a thirty (30) day extension because of unforeseen and uncontrollable circumstances. Therefore, to avoid having to issue a potentially large number of individual approvals on a case-by-case basis and waste limited agency resources during the time of emergency, the Department authorizes a general extension of time of thirty (30) days from the expiration of the 90-day, 180-day or 270-day accumulation period, as applicable, for the storage of hazardous wastes on site by all hazardous waste generators in the parishes within the Emergency Areas, for whom the accumulation period expires within the term of this Order.

§ 3. Open Burning

The Department will consider, on an individual basis, requests for approval for open burning, by persons other than local governments or their agents, of **EVENT**-generated trees, leaves, vines, twigs, branches, grass, and other vegetative debris. Any such burning approved by the Department must be conducted in compliance with the requirements of the Debris Management Plan and LAC 33:III.1109.D.6. Local governments and their agents shall follow the provisions of the Debris Management Plan.

§ 4. Air Pollution Sources Other than Open Burning

a. The Department authorizes the minor repair of any previously permitted stationary source of air pollution that was damaged by the **EVENT** to restore it to its previously permitted condition without prior notice to the Department. Within thirty (30) days of commencing such repairs, however, the permittee shall notify the Department in writing, stating the location and nature of the work and providing the name,

address, and telephone number of the representative of the permittee to contact concerning the work. Minor repairs are those that do not constitute "reconstruction" under any definition in 40 CFR Part 60 or 63; do not affect the potential to emit of any pollutant; and do not violate any other provision of NSPS, NESHAP, or MACT standards. Repairs that constitute "reconstruction" under any definition in 40 CFR Part 60 or 63 or repairs that affect the potential to emit of any pollutant are not authorized by this Order.

b. The Department will consider, on an individual basis, requests for approval for, but not limited to, the following sources of air pollution:

i. temporary air pollution control devices, such as portable flares, used for vessel and pipeline segment purging and the limited operation of facilities with damaged vapor control equipment;

ii. portable storage tanks, used for interim storage while damaged equipment is being repaired; and

iii. repairs, other than the minor repairs addressed in Section 4.a above, of permitted stationary sources that have been damaged by the **EVENT**, provided that the sources are restored or replaced with equipment that is identical or functionally equivalent, to meet permit conditions. Requests should be directed to the Office of Environmental Services, Air Permits Division.

c. The Department authorizes temporary gasoline and diesel fueling stations at regulated industrial facilities for the express purpose of refueling onsite vehicles essential for plant operations and vehicles of plant employees.

d. The throughput of any temporary gasoline storage vessel used exclusively for providing gasoline to employees of the tank operator shall not be counted toward the thirty (30)-day average throughput for purposes of determining the applicability of control requirements under LAC 33:III.2131. This subsection applies only to gasoline provided to employees at or below the operator's cost. This subsection does not exempt the operator from any other applicable regulatory requirements, specifically including, but not limited to, the spill prevention and control requirements of the Louisiana Water Quality Regulations (LAC 33:IX).

e. LAC 33:III.507.J.2 provides that an upset condition constitutes an affirmative defense to an action brought for noncompliance with technology-based emission limitations. LAC 33:III.507.J.2.d requires the permittee to notify the Department in accordance with LAC 33:I.Chapter 39 when emission limitations are exceeded due to an upset. Because of the circumstances caused by the **EVENT** and the need to apply facility resources to quickly repair and correct conditions caused by the upset, the Department extends the prompt notification deadline to seven (7) days, provided the exceedance does not cause an "emergency condition" as defined in LAC 33:I.3905.

f. In accordance with LAC 33:III.501.B.1.e, owners/operators may bring on site and utilize nonroad engines, including, but not limited to, temporary portable electrical power generators, firewater pumps, and air compressors, as necessary. "Nonroad engine" is defined in LAC 33:III.502.A. Note that an internal combustion engine is not a nonroad engine if it remains or will remain at a location for more than 12 consecutive months. A location is any single site at a building, structure, facility, or installation. Any engine that replaces an engine at a location and that is intended to perform the same or similar function as the engine replaced shall be included in calculating the consecutive time period.

g. For permitted internal combustion engines operated in direct response to the **EVENT**, including, but not limited to, electrical power generators, firewater pumps, and air compressors, the Department suspends any limitations on operating time imposed by the applicable permit until such time as normal operations are restored or until the expiration of this Order, whichever is earlier. Emissions from the operation of such engines shall not count toward applicable ton per year emission limitations. All other provisions applicable to the engines shall continue to apply.

i. The owner/operator shall notify the Office of Environmental Services, Air Permits Division, in writing, by no later than thirty (30) days after the effective date of this Order, if operation of permitted internal combustion engines in excess of permitted limits has occurred or is anticipated. Relevant emission point and permit numbers should be included in this correspondence.

ii. A report summarizing the operating time of permitted internal combustion engines in excess of permitted limits and the resultant criteria and toxic air pollutant emissions shall be submitted to the Office of Environmental Services, Air Permits Division, by no later than ninety days after the effective date of this Order, and quarterly thereafter until the expiration of this Order, or any extensions or revisions thereof.

h. To accommodate the distribution of fuels and other liquid materials, the Department suspends throughput and emission limitations imposed on transfer operations, including tank truck and railcar loading racks and marine tank vessel loading operations, for fourteen (14) calendar days following the effective date of this Order provided that compliance with all applicable federal and state regulations pertaining to the transfer of the materials loaded (e.g., LAC 33:III.2107, LAC 33:III.2108, 40 CFR 63 Subpart G, 40 CFR 63 Subpart Y) is maintained.

i. The owner/operator shall notify the Office of Environmental Services, Air Permits Division, by no later than thirty (30) days after the effective date of this Order, if throughput in excess of permitted limits has occurred. This report shall disclose the throughput in excess of permitted limits and the resultant criteria and toxic air pollutant emissions. Relevant emission point and permit numbers should be included in this correspondence.

i. To accommodate the storage and/or distribution of liquid materials, owners/operators may change the service of permitted storage vessels without prior approval of the Department provided compliance with all applicable federal and state regulations pertaining to the materials stored (e.g., LAC 33:III.2103, 40 CFR 60 Subpart Kb) is maintained. All changes of tank service effected pursuant to this subsection shall be documented and reported to the Office of Environmental Services, Air Permits Division, by no later than thirty (30) days after the effective date of this Order, and quarterly thereafter until the expiration of this Order, or any extensions or revisions thereof. Relevant emission point and permit numbers should be included in this correspondence.

§ 5. Asbestos

- a. The Department waives the requirement, under LAC 33:III.5151.F.2.e, to provide notification by phone, fax, email, or voice mail to the Office of Environmental Services (OES) and DEQ regional office responsible for inspecting the project site as soon as possible, but in no case later than four (4) hours after learning of the incident resulting from the EVENT. However, no later than one (1) business day of commencing such demolition, renovation, or asbestos-contaminated debris activity (ACDA), the person responsible for such work shall notify the OES and the DEQ regional office responsible for inspecting the project by email. The Notification of Demolition and Renovation and Asbestos Contaminated Debris Activity Form AAC-2(a), which may be found at <https://www.deq.louisiana.gov/resources/category/asbestos?y=1900&keyword=&pn=1>, shall be submitted within five (5) working days together with required fees, in accordance with LAC 33:III.5151.F.2.e.ii, after the emergency notification is made by email. The procedure in LAC 33:III.5151 (demolition/renovation/ACDA/response action) and LAC 33:III.Chapter 27 (accreditation and training requirements) for handling asbestos-containing material shall be complied with during demolition, renovation, ACDA, transportation, and disposal, except as otherwise provided herein. Construction and demolition debris generated from residential structures of four units or less that are subject to a government-ordered demolition shall be disposed of in accordance with the Debris Management Plan, except Regulated Asbestos-Containing Material (RACM) shall be disposed of in a Type I/II landfill. Burning of asbestos-containing material is prohibited.
- b. Building debris on the ground from structures totally destroyed by natural forces (as opposed to structures demolished in whole or in part by human activities) is not subject to LAC 33:III.5151 requirements related to demolition and renovations, transport, or disposal requirements. This

debris did not originate because an owner or operator destroyed the building. Note: if someone demolished a building that was subject to the LAC 33:III.5151, the debris on the ground would be subject to the LAC 33:III.5151 requirements even if the demolition occurred prior to or after the EVENT. If the debris is not broken into pieces but requires further demolition, it is subject to LAC 33:III.5151.

- c. The Department waives the requirement, under LAC 33:III.2799.F.2.b.ii, that applicants seeking accreditation in Louisiana that have received training from providers recognized by EPA or an EPA authorized state not recognized by Louisiana also submit proof of a current two (2) hour training course in current Louisiana regulations from a Louisiana recognized asbestos training provider.
- d. The Department waives the requirement pursuant to LAC 33:III.2741.E.2.c, that recognized asbestos Training Providers give the Department notice at least five (5) working days prior to class commencement or one (1) working day prior to class commencement, if only the Louisiana regulations course will be taught. Notice shall be provided to OES no later than 24 hours after class commencement.
- e. The duration of worker, contractor/supervisor, and inspector initial and refresher training courses is specified in numbers of days. A day of training may equal nine or ten consecutive hours, including breaks and lunch. For example, a 32-hour worker class may be taught in 9-hour days, reducing the class time on the fourth day by six (6) hours, a 40-hour contractor/supervisor class may be taught in 10-hour days, reducing the class time to four (4) days, and a 24-hour inspector class may be taught in 10-hour days, reducing the class time to 2.5 days.
- f. The Department waives the requirement pursuant to LAC 33:III.2707.A.3, in the event that emergency use of an uninspected building as a school or state building is necessitated, such building shall be inspected within 30 days after the decision to use them. If an inspection of the building cannot be conducted within 30 days of the decision to use the building as a result of the EVENT, the agency using the building as a school or state building may request an extension of the deadline to inspect the building of not more than four (4) months after the decision to use the building. The request for extension shall be submitted to OES.

- g. The Department waives the requirement pursuant to LAC 33:III.2723.A.1 that the local education agency or state government must submit a management plan prior to all buildings that are leased, owned, or used as a school or state building. A management plan shall be submitted within six (6) months of the initial use of the building.

§ 6. Records Management

Copies of LDEQ documents are usually available online in LDEQ's Electronic Document Management System (EDMS). The EDMS is available at <http://edms.deq.louisiana.gov>. Additional documents may be available by placing a Public Records Request using the online form at <http://edms.deq.louisiana.gov/prr> or the printable paper form available at <http://deq.louisiana.gov/assets/docs/General/PublicRecordsRequestForm.pdf>. There is no charge to replace copies of documents destroyed by **EVENT**. Please contact Records Management with any questions at (225) 219-3171 or deqrecords@la.gov.

§ 7. General Conditions

- a. This Order does not convey any property rights or any rights or privileges other than those specified in this Order.
- b. This Order only serves as relief for the duration of this Order from the regulatory and proprietary requirements of the Department, and does not provide relief from the requirements of other federal, state, and local agencies. This Order therefore does not negate the need for the property owner or facility operator to obtain any other required permits or authorizations, nor from the need to comply with all the requirements of those agencies.

§ 8. General Limitations

The Department issues this Order solely to address the emergency created by the **EVENT**. This Order shall not be construed to authorize any activity within the jurisdiction of the Department except in accordance with the express terms of this Order. Under no circumstances shall anything contained in this Order be construed to authorize the repair, replacement, or reconstruction of any type of unauthorized or illegal structure, habitable or otherwise.

§ 9. Other Authorizations Required

Nothing in this Order shall eliminate the necessity for obtaining any other federal, state, or local permits or other authorizations that may be required.

§ 10. Extension of Time to Comply with Specified Deadlines

For facilities regulated by the Department in the Emergency Area, this Order extends the time for a period of thirty (30) days to comply with the following specified deadlines that occur between **March 22, 2022**, and the expiration of this Order:

a. The time deadlines to conduct or report periodic monitoring required by permits, other authorizations, enforcement actions, or settlement agreements, except for monitoring required by air permits issued under Title IV or V of the Clean Air Act or under the PSD program;

b. The time deadlines to file an application for renewal of an existing permit, except for air permits issued under Title V of the Clean Air Act. Renewal applications shall not be submitted later than the expiration date of the existing permit.

§ 11. Completion of Authorized Activities

All activities authorized under this Order must be commenced before the expiration of this Order unless otherwise provided in an authorization or permit. The deadline for commencement under any authorization or permit issued under this Order may be extended on a showing that contractors or supplies are not available to commence the work, or if additional time is needed to obtain any required authorization from the Federal Emergency Management Agency, the U.S. Army Corps of Engineers, or other local, state, or federal agencies.

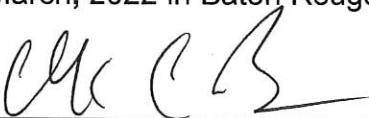

§ 12. Amendments

This Order may be amended as required to abate the emergency.

§ 13. Expiration Date

This Declaration of Emergency and Administrative Order shall take effect immediately upon execution by the Secretary of the Department, and shall expire at midnight on the thirtieth day after the date of execution set forth below, unless modified or extended by further order.

DONE AND ORDERED on this 24th day of March, 2022 in Baton Rouge, Louisiana.

Dr. Chuck Carr Brown
Secretary
